CONTACT DETAILS07

01

Our mission is to provide the highest quality ironmongery products, both local & international, for our clients & customers through exemplary service and reliable deliveries.

Status brings together the collective architectural ironmongery expertise of three of the best-known and most highly regarded names in South Africa.

Together, Buchel, Bildware and W&B boast nearly two centuries of experience in South Africa.

We provide not only the finest quality handles, hinges and locks, but also the best specification advice. Our teams work closely together with architects, interior designers,

quantity surveyors and other industry players to ensure that the handles, hinges and locks selected for your project are the best combination of functional and beautiful.

We have a reputation for professionalism and reliability that we value very highly.

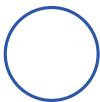

It is testament to our service that the doors to many of the most famous landmarks in South Africa open thanks to our handles, hinges and locks.

MAINTENANCE PROGRAM:

STAINLESS STEEL

All stainless steel surfaces should be wiped over with a clean cloth and warm water with a mild detergent on a frequent basis to preserve the appearance of the surface and its resistance to corrosion. For more stubborn dirt or stains, use mild, non-scratching abrasive powders such as household cleaners.

For more aggressive cleaning, add a small amount of vinegar. Carbon steel brushes and steel wool should be avoided as they may leave particles embedded in the surface, which can lead to rusting. After cleaning the stainless steel surface, immediately rinse with clean hot water and dry with clean dry cloth.

The minimum recommendation for routine cleaning is once a month, and more often when the surface is subject to frequent use or heavy soiling.

POLISHED BRASS FINISHES

The majority of polished brass products are supplied with a clear lacquer protective coating. Regular cleaning is recommended using a soft cloth and warm water.

The lacquer will break down in time, especially in outdoor or coastal conditions as the lacquer develops porosity. When this occurs, the brass will start to tarnish and the product will appear to start rusting.

To restore the product to its original finish, strip the lacquer with thinners, acetone or equivalent and polish.

GUARANTEE POLICY:

All Status Ironmongery is guaranteed for a period of 5 Years against any defects in material or workmanship. All Stainless Steel Lever Furniture and Pull Handles are Grade 304.

Hinges are available in Grade 304 - Stainless Steel fire rated and Grade 201 - Stainless Steel for non-coastal applications. Swinging Fire Doors closers non-hold open 980 Series have been manufactured in accordance with the Standard indicated on the Certificate of Compliance.

Defective product will be replaced with a new unit, but no claims for damage incurred or work done thereon will be entertained. The guarantee is void if the product has been subject to misapplication or abuse.

OUR PROJECTS

"Our high quality handles, hinges and locks feature in some of the most high profile landmarks across South Africa."

WE FEATURE IN SOME IMPRESSIVE PROJECTS

Across South Africa and beyond

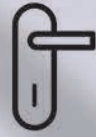

Our high quality handles, hinges and locks feature in some of the most high profile landmarks across South Africa. Our specialist teams have assisted on hotels, airports, sports facilities, retail, medical, education, residential and corporate offices as well as government facilities and international projects.

Our impressive track record of successful projects includes:

- King Shaka International Airport, Durban
- Moses Mabhida Stadium, Durban
- Mamelodi Sundowns Sports Complex
- Nelson Mandela Bay Stadium, Gqeberha
- Kusile Power Station
- German Embassy, Pretoria
- Gautrain Stations, Johannesburg and Pretoria
- Woodmead Office Park, Johannesburg
- PWC Tower, Waterfall, Johannesburg
- Michelangelo Hotel, Johannesburg
- Da Vinci Hotel, Johannesburg
- Sandton City Hotel, Johannesburg
- Hotel Fire & Ice, Johannesburg
- Time Square Casino, Pretoria
- The Pearl Don, Umhlanga
- Mediclinic, National
- Curro Private Schools, Gauteng
- Menlyn Learning Hub, Pretoria
- Kyalami Mall, Johannesburg
- Land Rover/Jaguar Rivonia, Johannesburg
- Long Beach Hotel, Mauritius
- Bellevue Estate, Seychelles
- Madinat Project, Dubai
- St Helena Airport

HANDLES_

Handles to open every door

In a range of materials

A door handle is usually our first tactile encounter with a building. It needs to look good and work beautifully, regardless of whether it is installed in a residential unit, an office, school or hospital. Our wide range of handles is suitable for a variety of applications, in a variety of styles. Whether you're designing a modernist masterpiece or offering a fresh take on a more traditional style, our handles will add the perfect finishing touch.

To ensure the longevity of your handles, hinges and locks, it is vital that you take conditions on site into consideration. For coastal conditions, a higher grade stainless steel is a major advantage. Grade 304 is the most widely used type of stainless steel thanks to its strength, versatility and excellent corrosion resistance.

Our handles are available in solid and tubular Grade 304 stainless steel, with a mild steel inner with a stainless steel cover for the rose. All tubular handles are 90mm diameter with an 8mm spindle and 1.2mm plate thickness.

Care should be taken when specifying brass handles, which are sealed with lacquer to protect the material and prevent tarnishing. In coastal applications, the brass can still tarnish at the places where the lacquering is damaged.

Grub fixes the spindle in the handle and helps prevent sliding into one side of the handle and creating a lock out.

Our advantage of our handles is the back to back fixing holes for through the door fixing with patent fixing screws. This pulls the entire plate together and doesn't rely on the wood to keep the handle in position. Back to back fixing screws are supplied, so you can be assured of a professional and neat installation.

- 1) ***Brass handles have a lacquer over to protect/prevent tarnishing.***
- 2) ***In coastal applications, the brass can still tarnish at the places where the lacquering is damaged.***
- 3) ***Grub fixes the spindle in the handle and help prevents sliding into one side of the handle and create a lock out.***

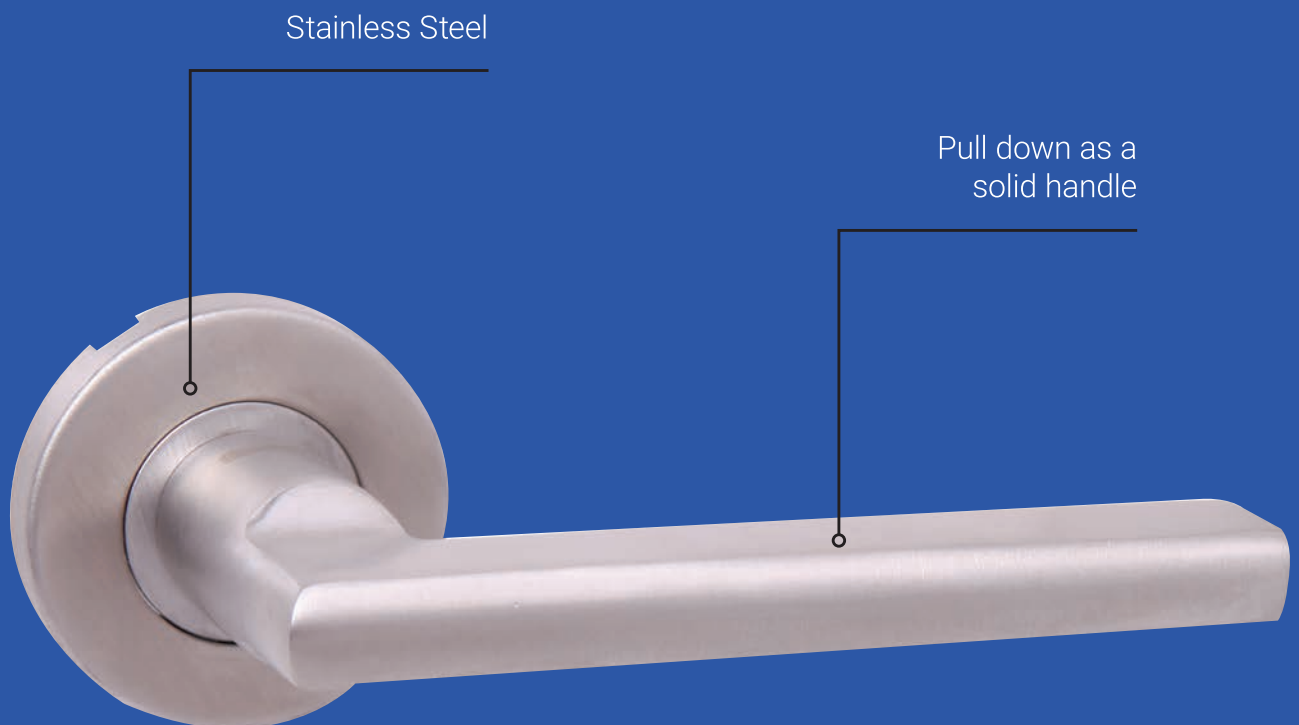

Features:

- *Handles are available in solid and tubular stainless steel*
- *Handles are grade 304 Stainless Steel*
- *All Tubular handles are 90mm diameter of tube*
- *8mm spindle*
- *1.2mm plate thickness*
- *Check other features possibly available as generic form QS*
- *Mild Steel Inner with stainless steel cover for rose*
- *Back to back holes for back to back fixing (This pulls the entire plate together and doesn't rely on the wood to keep the handle in position)*
- *Supplied with back to back fixing screws*

More on ***Stainless Steel Materials***

We offer an extensive range of handles suitable for different applications, ranging from light duty to heavy duty. Our hinges are available in Grade 201 and 304 stainless steel as well as polished brass and aluminium.

For coastal applications the higher the grade the better the stainless steel.

HINGES_

Success hinges *on quality products*

Hinges to suit every need

Hinges might be less visible than handles or locks, but they are just as important in ensuring the functionality of your doors. You want hinges that will ensure the smooth opening and closing of doors, with minimal maintenance over the years.

We offer an extensive range of hinges suitable for different applications, ranging from light duty to heavy duty. Our hinges are available in Grade 201 and 304 stainless steel as well as polished brass and aluminium.

For higher security applications, some of our hinges offer security resistance. We also offer Grade 13 ball bearing hinges, the most popular type of hinge in the world today, able to bear weights of up to 120kg.

Certain hinges in our range are fire rated for additional peace of mind.

Features:

- *Classification Grade 13 hinge*
- *Security resistance*
- *Certain hinges are fire rated*
- *Certain hinges can carry 120kg doors*
- *Hinges are available in Grade 201 & 304, stainless steel and polished brass & aluminum*
- *Range from light duty to heavy duty available*
- *Extensive range and offering for different applications*

LOCKS_

Locks for your **peace of mind**

From entry level to high security

A door matters just as much when it is closed as when it is open. With security an important consideration on any project, you want to know that you are installing the best quality locks for the job.

Status offers a wide variety of locks suitable for different applications, from entry level to high security. You can be confident that our high security locks are designed to resist any break in attempt, as they are supplied with an anti-pick, curtain strengthened deadbolt, boxed striker plate, and 5 keys.

Our sticker plates and forends are available in brass, chrome and stainless steel, with black on request.

All of our cylinders and aluminium door locks are from Italy, while all of our cylinders are UNI-EN-1303..2005 along with 16000C40 certification.

All of our locks are SABS approved and/or comply to EU standards.

Features:

- *Wide variety for different applications*
- *Entry level to high security*
- *High security locks come with an anti pick curtain strengthened deadbolt, boxed striker plate, and 5 keys*
- *SABS approved or EU standards on all locks*
- *Sticker plates and forends available in brass, chrome and stainless steel*
- *Black on request*
- *All cylinders are UNI-EN-1303..2005 along with 16000C40 certification*
- *All cylinders and aluminum door locks are from Italy*
